

VibeSecur™

Keep software, infrastructure and AI

Secure, compliant and reliable as they change.

Self-Healing Engineering Systems

**Your systems stays at the highest standards.
Always.**

A bank runs on foundations that must **ALWAYS** stay true.

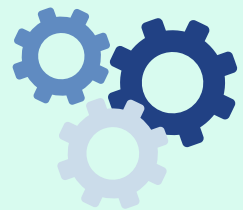

Payments go through.

Money moves when & where it should.

Customer data ALWAYS stays private.

Each customer sees only their own data.

Required systems are reliable

Critical systems do not silently fail.

AI stays inside its boundary.

It helps without taking unsafe actions.

When one of the foundations breaks, the bank loses trust, time and money.

For every update in the banking system, bank should ask ONE question.

Are the FOUNDATIONS still holding up?

That is what failure feels like to a customer.

The Trustee Savings Bank in Britain customer **incident report** in 2018 after a major system migration.

Craig opened his TSB app.

He saw somebody else's account.

Which means...

Somebody could see and access my money and account aswell?

When the Foundations Break, the Damage Is Massive.

\$108M

TSB redress + fines after
migration failure

\$75M

Citi penalty after missed
remediation milestones

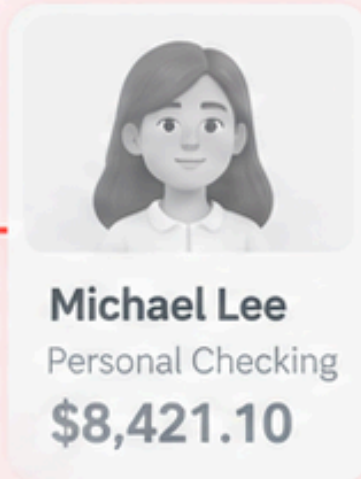

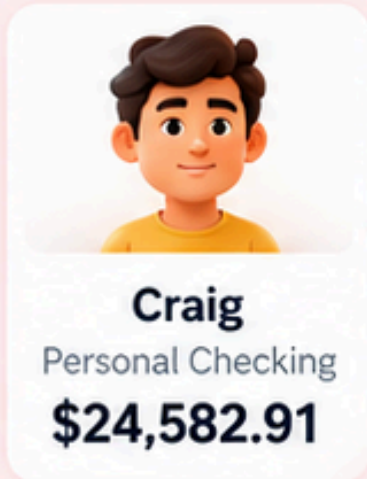

LOSS OF TRUST. LOSS OF INTEGRITY. LOSS OF CUSTOMER MONEY.

TSB did not just lose money. It lost time, trust, and integrity with its customers.
Customers lost money. Hundreds of hours and effort went into reversing
the damage, but some consequences were still irreversible.

In Ideal Conditions, what should be done?

Getting safely back to normal is.

1 Stop the wrong access

The bad condition must disappear immediately.

2 Keep the service working

Legitimate customers still need the bank.

3 Make sure it is truly fixed

The bank needs proof before moving forward.

Fix the problem. Keep customers running. Prove it is safe.

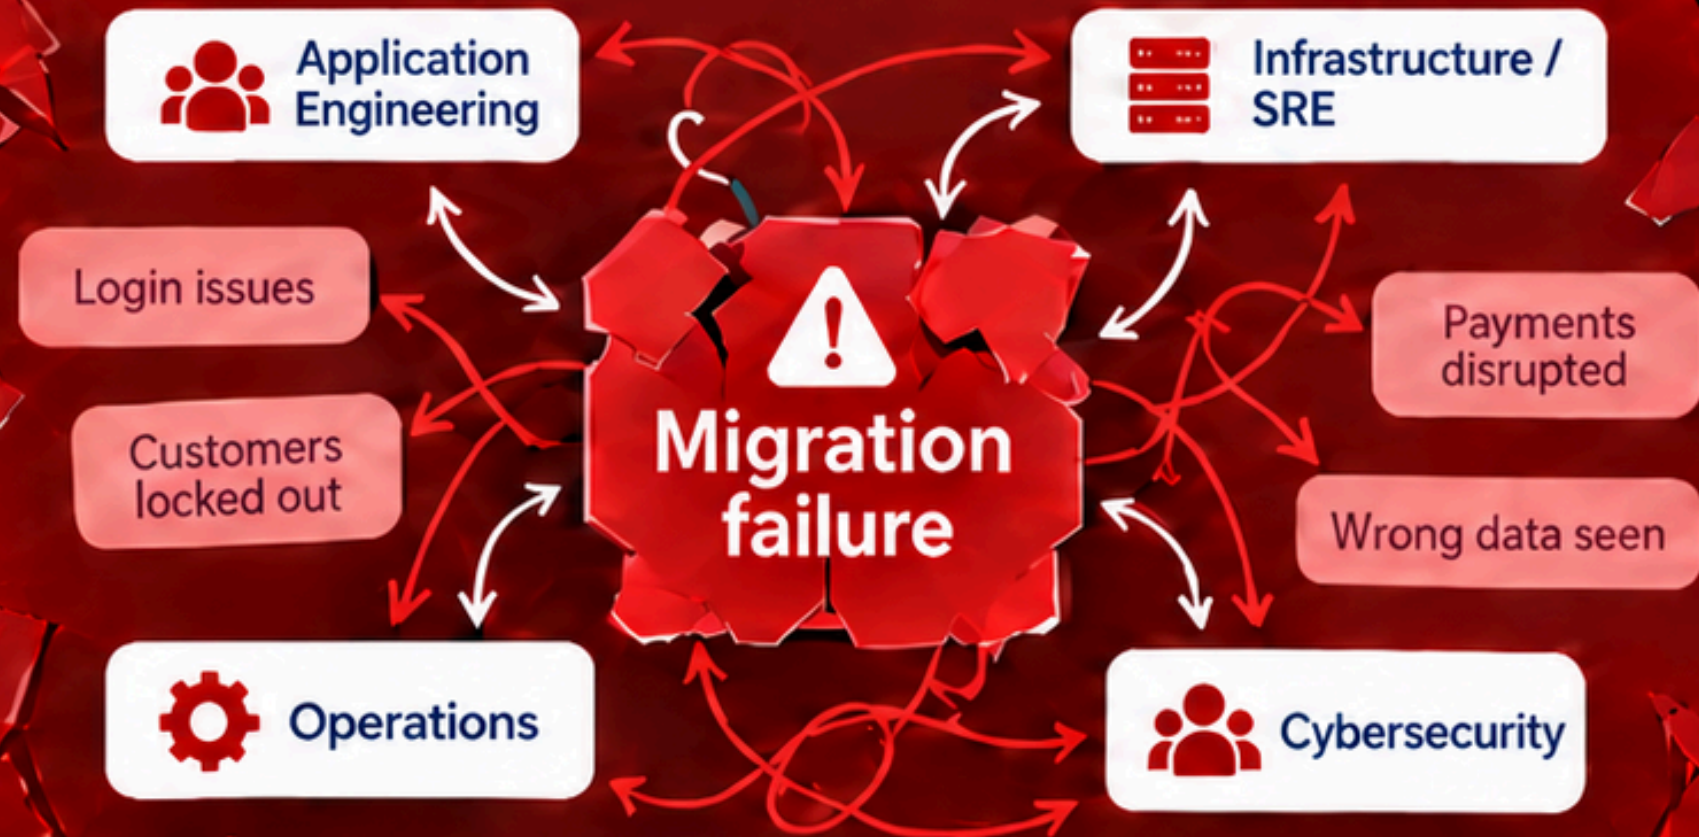

That is how a bank gets back to normal.

TSB could not fix it because recovery was fragmented and manual.

One migration failure became many separate recovery efforts.

WHAT HAPPENED

BANKING STILL BROKEN

Everyone is busy.

The customer is still waiting.

More handoffs. More waiting. More chances to miss something.

WHAT SHOULD'VE HAPPENED

1

SEE THE PROBLEM

One live view of what broke.

2

FIND THE CAUSE

VibeSecur investigates what changed.

3

FIX IT AND CHECK AGAIN

VibeSecur fixes the issue and proves it is gone.

CUSTOMERS BACK TO NORMAL

VibeSecur closes the gap until the bank is back to standard.

Your systems stay at your highest standard. Always.

VibeSecur continuously compares your desired state with reality. When reality drops, it closes the gap and brings your systems back.

When reality drops below your standard, VibeSecur closes the gap and brings it back.

Within your permissions

High-risk actions need approval

Every result is independently checked

Customers are already trusting VibeSecur to automate real assurance and recovery work.

We achieved this in the first 60 days after we started selling.

Commercial traction

Programs

COMING NEXT

Expanding access in the next 12 months.

Self-serve
(for smaller teams)

VibeSecur Box
(private deployments)

Open source
& White-label
(partner ecosystem)

AED 10,000 / month + 5% of verified savings

A simple, transparent model. You keep the vast majority of the value.

A PRICING
MODEL
ALIGNED
WITH YOUR
VALUE

EXAMPLE

180 hours
saved per month

×

AED 1,000
average cost per hour

=

AED 180,000
value created for you
in one month

VALUE SPLIT

AED 171,000
You keep 95%
of the value

AED 19,000
VibeSecur earns
(AED 10K + 5%)

Lower costs through fewer incidents,
faster resolution and less rework

Higher productivity across your teams

Measurable ROI from day one

LESS RISK.
MORE PROGRESS.

You focus on your business.
We help keep your systems at the highest standard. Always.

\$300K to scale what is already working.

Stronger product. More revenue channels. Wider markets.

Research & Product Development

Make VibeSecur more efficient,
safer and more sticky.
Reduce costs. Improve reliability.
Apply design thinking to build
what customers love.

Next 3 Commercialization Engines

Launch self-serve, VibeSecur Box
and open source / white-label.
These feed into each other for
continuous revenue and market pull.

Market Expansion

Take VibeSecur to new
geographic markets.
Grow direct and partner-led sales
across the UAE, GCC, India,
North America, Europe and beyond.

A STRONGER VIBESECUR.
MORE CUSTOMERS. A SAFER DIGITAL WORLD.

Core Team

Venu brings customer reality in. Dikshith turns it into self-healing product. Kae keeps execution moving.
